# Installation Process

# (1) Installing WordPress CMS

Today, most of hosting companies provide **one-click-install** feature for WordPress, for example Fantastico, Softaculous, etc. Please contact your hosting for the detail.

If you want to learn more about “Installing WordPress, please visit this link.

[http://codex.wordpress.org/Installing\\_WordPress](http://codex.wordpress.org/Installing_WordPress)

## (2&3) Install Marketica WordPress Theme

Go to Appearance > Themes > Install Themes > **Upload**

If you download the Marketica Full Package ZIP from ThemeForest, you can extract this ZIP file first, and you can find theme files under separate folders.

**marketica-wp-vx.x.zip** (parent theme)

**marketica-wp-child-vx.x.zip** (child theme)

Go to **Appearance > Themes > Add New > Upload**

Upload **both** marketica-wp-vx.x.zip and marketica-wp-child-vx.x.zip

And then activate this theme Marketica WP Child (child theme).

If you have a theme in a .zip format, you may install it by uploading it here.

Choose File No file chosen

Install Now

### WHAT IS A CHILD THEME AND WHY USE IT?

Child theme builds upon an existing theme, without modifying the original theme, so that if the theme ever gets updated, your modifications to the theme are safe, because you've created a new theme and the update will only change the original files.

With a child theme, you can rebrand our theme with your own name, without modifying our theme!!!

# (4a) Install Required & Recommended Plugins

For first use, please install and activate all of them

## (4b) Update Permalinks

The Permalink settings can be found in your **Settings > Permalink** menu.

Do not use “default” permalink structure. `/%postname%/` is recommended.

From here you can also configure the URL structure for your shop and product pages.

- Whether to prepend shop categories/tags with shop base page (eg `yourdomain.com/shop/product` or `yourdomain.com/product` )
- The product category base slug (default is `/product-category/` )
- The product tag base slug (default is `/product-tag/` )
- Product attribute base slug will optionally use a custom base before `/attribute-name/attribute/`

### Product Permalink Base

- These settings control the permalinks used for products. These settings will only apply when **not** using ‘default’ permalinks above.

Don’t forget to click **Save Changes** button.
